

Energy & Efficiency in Practice: Career Insights from the Field

Friday – January 30, 2009
11:30 a.m. to 1:30 p.m.

UC Davis Graduate School of Management, Bishop Ranch facility in [San Ramon](#)

Come learn about **CAREERS** in the **FAST GROWING** and **GREEN ENERGY TECHNOLOGIES** and **EFFICIENCY** job market from Executives and Managers working in the field!

RSVP Stephanie Timmons at stimmons@ucdavis.edu

PANELISTS:

**John Argo, Co-Founder and Chief Operating Officer,
Bloo Solar (MBA class of 2004)**

Mr. Argo is the Chairman and a founder of Bloo Solar. He is also one of the inventors of Bloo's 3rd generation solar cell technology. He has an extensive background in large-scale project management, technology architecture, and consulting. Mr. Argo's has 20 years industry experience, from startups to Fortune 100's, and has worked in Europe and the US.

**Rob Bremault, Key Account Manager,
Sacramento Municipal Utility District (MBA class of 1998)**

Mr. Bremault has over 22 years of combined experience in energy resource management and customer relationship information technology. He currently is an energy advisor for large commercial and industrial customers as well as the Energy Institute at UC Davis where he is also an on-line instructor for a certification program in energy management.

**Bruce Dickinson, Director, Business Development,
Chevron Energy Solutions**

Mr. Dickinson has developed over \$400 Million in energy efficiency, renewable energy and demand response projects within the state, local government, public and private university, community college, school district, manufacturing, and water/wastewater treatment agency markets.

**Mark Schmidt, Senior Finance Manager in the Residential, Light Commercial
and Components (RLCC) Business Unit, SunPower (MBA class of 1999)**

Mr. Schmidt assisted in SunPower's successful initial public offering in 2005 and then moved to the RLCC to develop financing products for residential and small commercial solar systems. He helped expand the business unit to Europe and was involved in SunPower's acquisition in Australia this past summer. He now has direct reports on four continents.

**Robyn Zander, Project Manager, Energy Efficiency Division,
Southern California Edison**

Ms. Zander has sixteen years of experience in manufacturing and contract administration, most of which has included emerging technologies and new product design. In the Energy Efficiency Division she is involved in third party solicitations in innovative design and heads an "incubator" element within the Innovative Design Department.
